rev. 12/2015

DESCRIPTION

ARCO FORATO is a perforated bituminous waterproofing membrane, with fibre glass reinforcement. Provided with distributed holes, it is used as diffusion layer.

It is applied loose-layd – the final waterproofing layer will be applied over it in “spot-bonding”, therefore providing the venting of the substrate.

Technical properties	M.U.	ARCO FORATO	Tolerances
		V	
Reinforcement		Fibreglass	
Roll length (EN 1848-1)	m	20	± 0,2 %
Roll width (EN 1848 -1)	m	1	± 1 %
Nominal weight (EN 1849 – 1)	kg/m ²	1,1	± 7 %
Reaction to fire (EN 13501-1)	class	F
